DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on 08/28/2008 have been fully considered and they are found unpersuasive. The IDS's filed by the Applicant have also been considered.
2. The rejection of claim 6 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

Claim Objections

3. Claim 1 is objected to because of the following informalities: The Applicants have not provided a page and line number in specification reciting: provided that the functional group is not the product of an anionic initiator. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1796

A person shall be entitled to a patent unless -

((e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 1-5, 8-9, 24-27 and 29-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al., U.S. Patent No. 7,238,751 (hereinafter "Wang"). Wang teaches a multilayer nanoparticle comprising a styrene based inner layer, an amine functionalized diene based rubber outer layer wherein the nanoparticle has a diameter of less than 100 nm. See Wang, Abstract; col. 8, lines 30-45. Wang teaches a monodisperse nanoparticle, which can be crosslinked, where the monomer selection includes butadiene, styrene and hydrogenating of diene monomer. See Wang, col. 3, line 15, col. 4, line 31 through col. 5, line 4, col. 6, line 50 through col. 8, line 45. Wang also teaches a nanoparticle prepare by a general process that comprises forming a diblock, adding a crosslinking agent and functionalized group through an initiator as covered by present claims 24-30. See Wang col. 2, line 60 through col. 8, line 45. Furthermore, Wang teaches the use aluminum (metal) hydrate as filler and Wang teaches the use of tin functionalized

nanoparticle in tire compositions. See Wang, col. 12, lines 2 and 39-40. In addition, Wang teaches the resultant nanoparticles containing amine groups on or near the nano-particle surface.

6. The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

8. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Thu, 10 AM - 8 PM.
